

## **ENVIRONMENTAL POLICY STATEMENT**

Wicks Manor Pork is dedicated to limiting the impact of its activities on the environment.

This is achieved by:

- Recycling all plastic, cardboard and paper waste using a reputable waste company.
- Recycling all waste water back into the land.
- Using the manure produced from the pigs as fertilizer on the land.
- Using straw that is bailed on the fields as bedding for the pigs.
- Reducing food miles by using local abattoirs to slaughter Wicks Manor's own pigs.
- Generating up to one third of the electricity with the use of solar panels.
